CoreSpec

# About Us

CoreSpec, formerly Codebalt, is an IT development company based in Jakarta. Our team consists of fresh and dynamic minds ready to assist you moving forward in the business world. Together, we offer an exclusive high standard of IT consulting and solution services to maximize your business potential. Combining a great work ethic, modern day thinking, and emerging technologies, we guarantee the best possible solution to all of your business' obstacles.

CoreSpec orchestrates every step carefully to deeply understanding clients' business and delivering and optimizing IT solutions from the initial phase of scoping the requirements, up to the final delivery, and maintenance

“

CoreSpec orchestrates every step carefully and we pay attention to every single detail for manufacturing a high-end product.

”

## Planning

Before executing our jobs, we will make thorough, calculated plans to ensure the final product will meet our client's expectation.

## Design

Offer a responsive, user friendly and breathtaking design to create a stand out user interface for smoother user experience.

## Development

Take a great care of our development program to fulfill the needs of our clients.

## Deployment

After getting through the process, we will deploy the product while maintain the high standard we set for ourselves to ensure our client' satisfaction.

# Vision

“

CoreSpec aims to become one of the leading IT consulting companies in Indonesia and worldwide market by helping our client implement cutting-edge technology which leverage their business advantages.

# Mission

“

CoreSpec maintains a high standard of work performance to deliver the best services for our client. Using the latest technologies, we ensure our client business growth and exploit their business potential to the next level.

# Services

## Business Applications

We offer you a cloud-based business application that ease and automate many aspects to empower your company business.

## Mobile Applications

Our Mobile department excels in Android and iOS application development for enterprise from planning stage to execution and deployment.

## Website Development

We develop responsive, clean and eye-catching sites ranging from corporate website, blogging to E-Commerce compatible with popular platforms.

## Managed Servers

Our managed servers ensure your business applications always available and deliver best performances to leverage your business.

## Support & Maintenance

We provide scheduled and crucial maintenance services in order to make sure your business activities run smoothly.

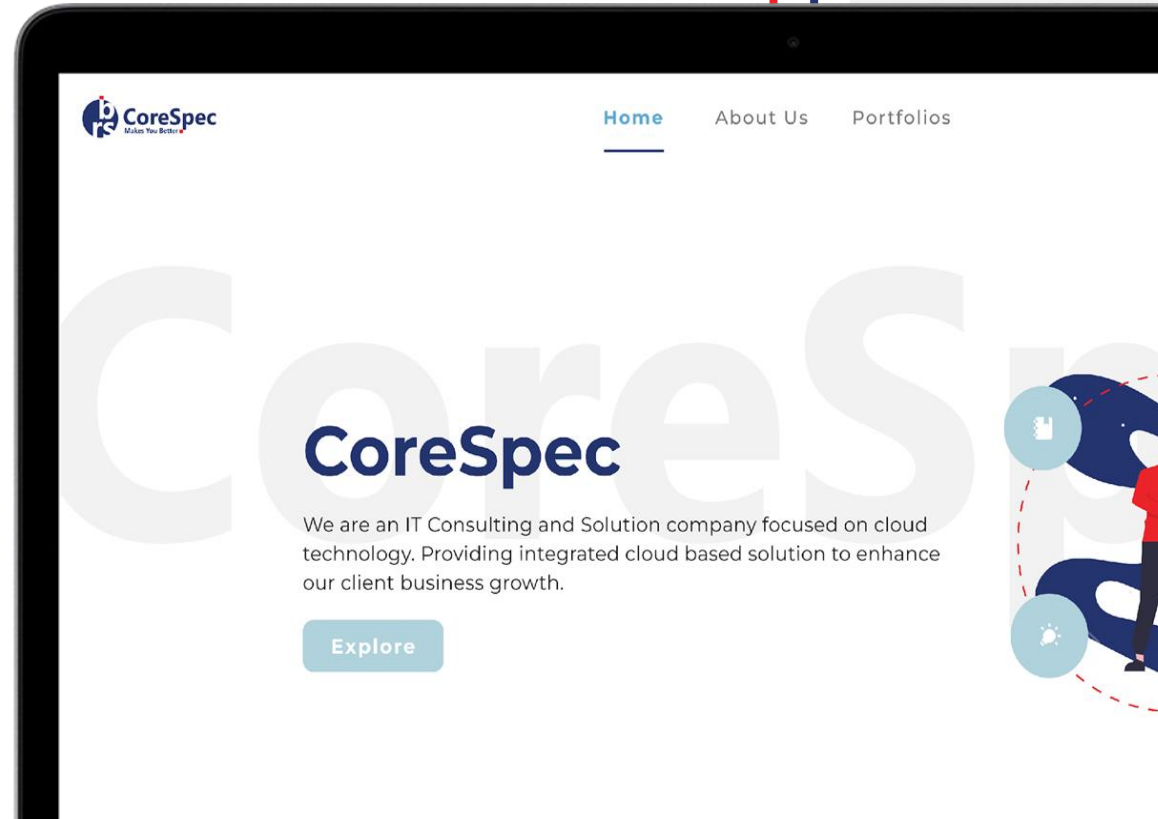

## Consulting Services

Our IT consulting services support corporates and personal in realizing the value of their IT investment by ensuring the best IT decisions.

# Building Division Website Map Based Portfolio

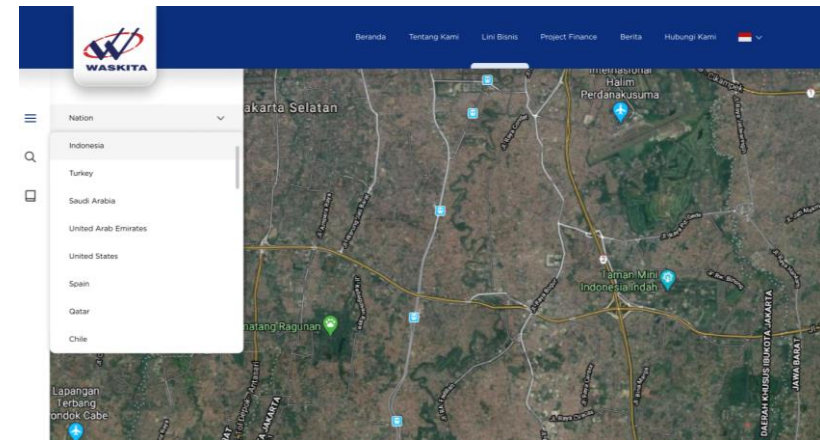

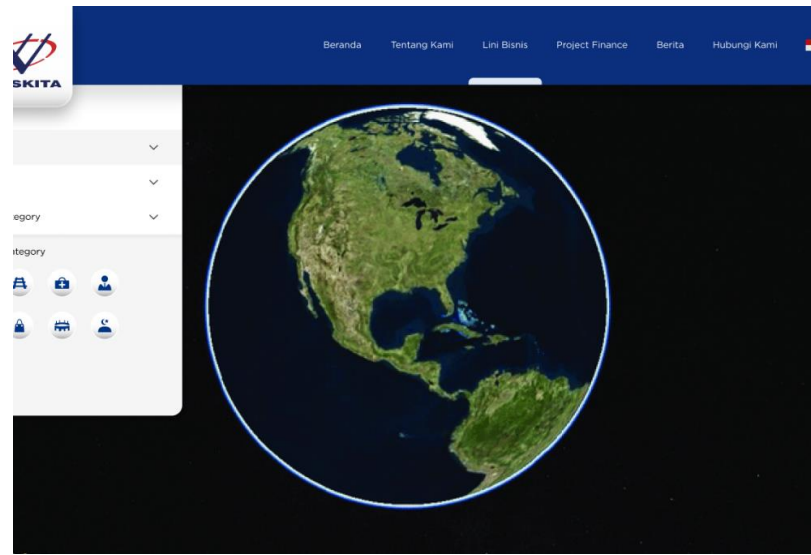

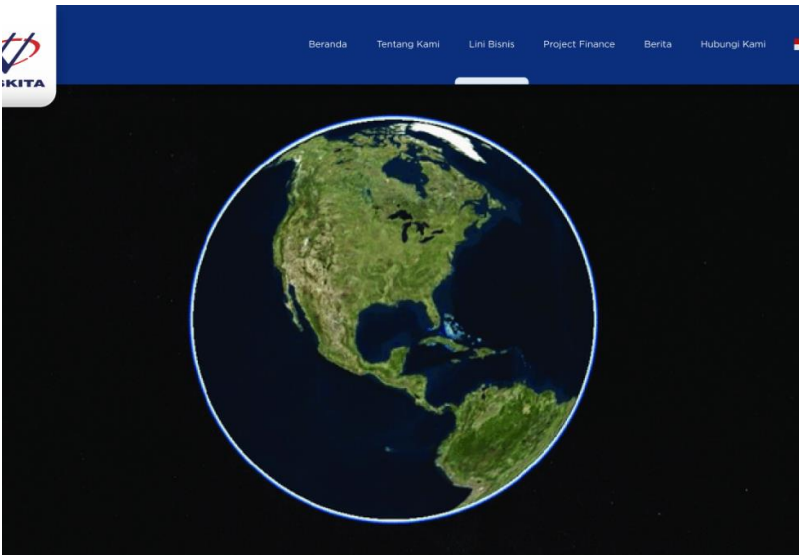

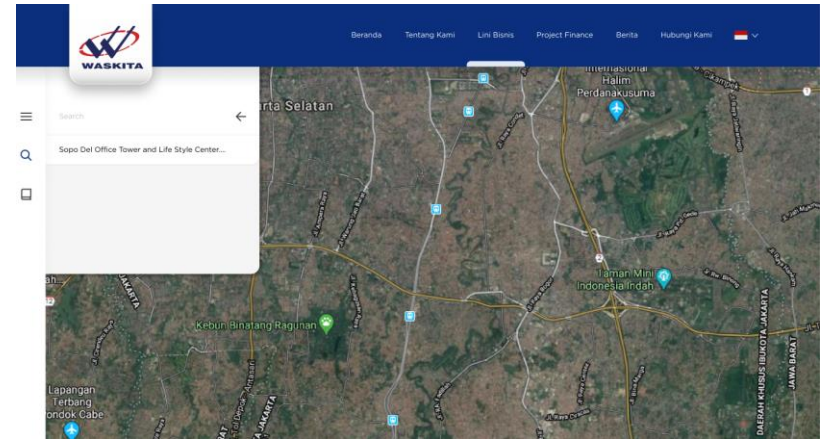

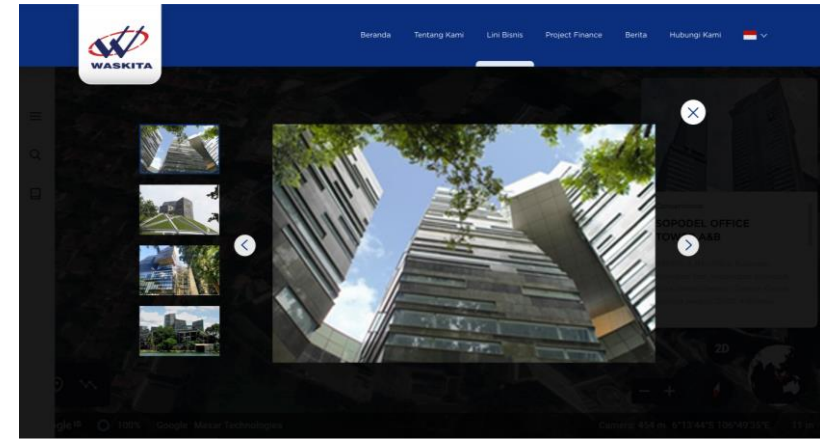

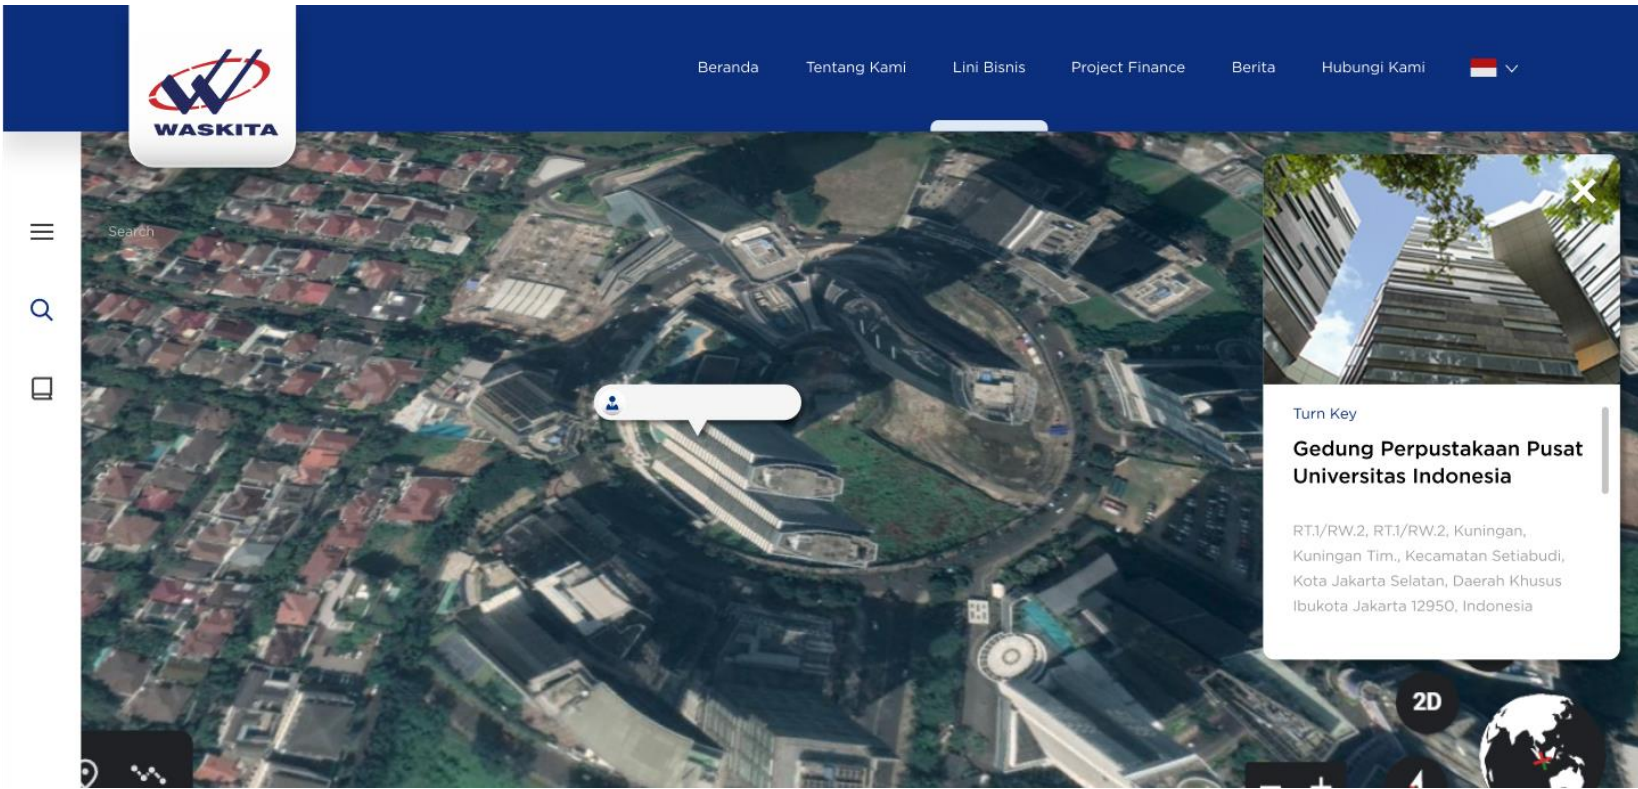

2019

Building Division Website Map Based Portfolio

CoreSpec as sub-contractor of PT Akusara Cipta Kreasi provided enhancement of Waskita Karya Building Division Website. Additional feature that were added are coordinated camera animation google earth-like portfolios. The portfolio section of the building division is presented in 3D earth and indexed for search and exploration.

Selected portfolio will take visitors to the actual building location in coordinated camera animation to showcase the 3d model of the building on the maps. Additional information related to the portfolio are displayed on the left and right side of the screen without blocking the 3D model of the building.

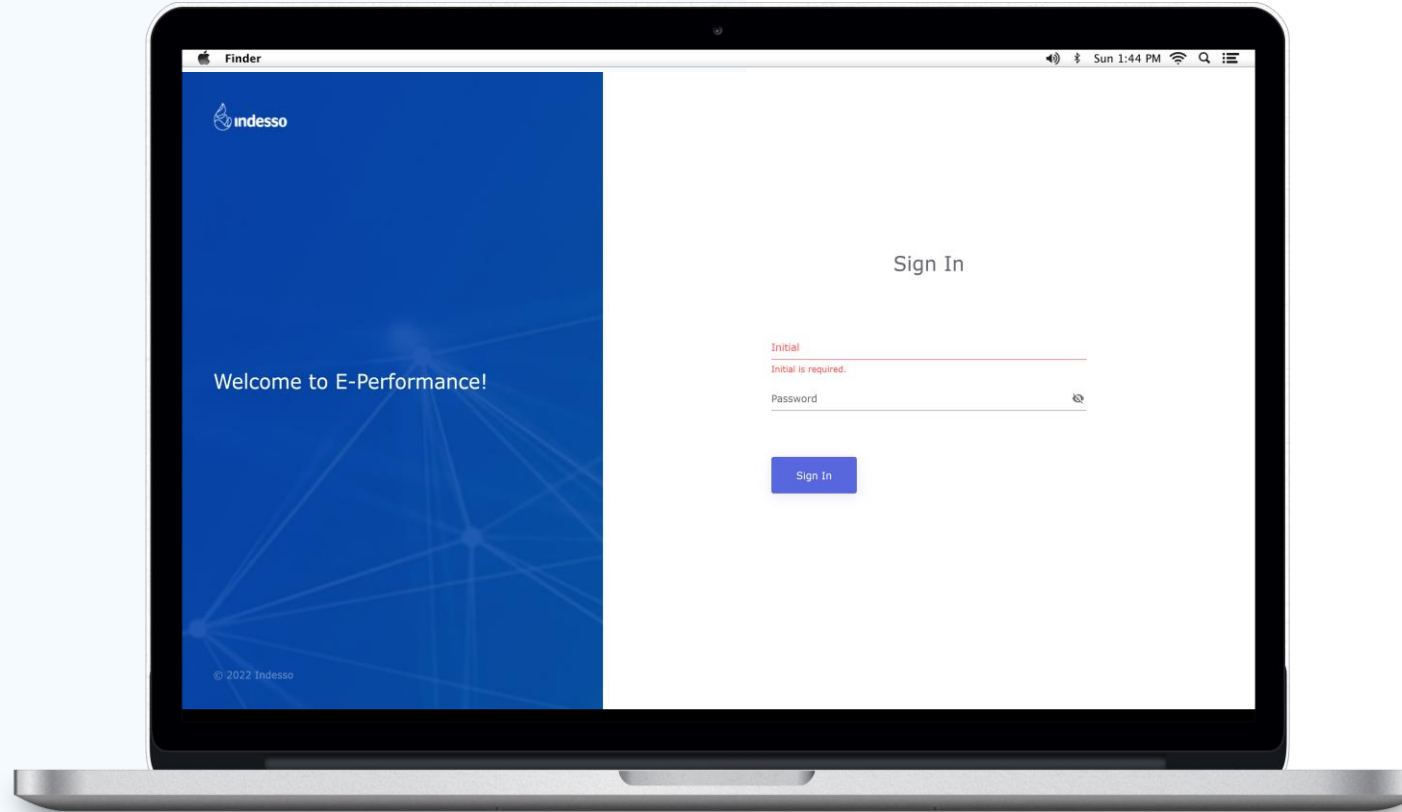

# Client

Indesso Group, founded in Baturaden, Purwokerto, Central Java in 1968, is known as a manufacturer of multifarious ingredients supplying both national and international markets. CoreSpec starts a partnership with Indesso Group in 2019 providing IT consultation & software development for various Indesso's projects.

# Indesso E-Performance

# 2019

Indesso E-Performance

CoreSpec developed and provided technical consultation in building Indesso's internal Web Application to plan, monitor and evaluate group-wide organizational units and employees key performance indicators. Each divisions, departments and sections head set their subordinate KPIs target that will be evaluated every semester. Final output of the evaluations are used for employees' development plans as well as their level (Colongan).

# Indesso E-Recruitment

2020

Indesso E-Recruitment

CoreSpec developed a Web Application for group-wide recruitment process for the Indesso Group Human Resources Department. Each organization units head requests their yearly man-power request which will need to be approved upto owner. Yearly man-power requests are compiled and presented to the BOD as man-power planning for budgeting. Approved man-power requests then published as open vacancy in Indesso Website.

Interested candidates may directly apply by filling their information and uploading their CV directly on the website. Recruitment process for each position then monitored in several layers from Screening process until on boarding. Reports and analytics are presented in real-time graphs and metrics accessible on internal web-based HR Platform.

# Indesso HR Platform & Learning Management System

# 2020

Indesso HR Platform & Learning Management System

In conjunction with E-Recruitment system development, we also developed the HR Platform including Learning Management System which acts as a single point of entry for HR related processes such as recruitment, employee management and learning management system. Structural organizational unit and employee data are automatically synchronized daily from SAP system.

The HR Platform also hosts additional employee data that are not available in Indesso Group SAP such as Family information, Training and certification history. The Learning Management System provides three main features which are Online Learning, External Training and Internal Coaching.

2020

Indesso HR Platform & Learning Management System

Online Learning materials are structured as a Course consisting of several chapters and sections in multiple learning media formats: Video, Audio, Infographics, PDF Modules and Interactive Quiz. External Training facilitates management of providing specific training for Indesso employees from external vendors. The whole process is digitized including vendor sourcing, training request from heads, training approvals, monitoring, reporting and evaluations. Internal Coaching functions as a scheduling and journaling system for coaching of employees from their supervisors.

# Indesso Company Website

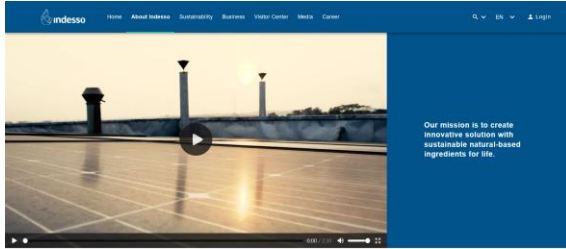

2020

Indesso Company Website

CoreSpec designed and developed a new Website for Indesso Group accessible at <https://www.indesso.com> with in compliance with Brand Guidelines of Indesso. The website informs company profiles and showcases products of Indesso Group. Interactive chat-based inquiry feature are built from scratch to help visitors get information they need. Global site-wide search feature supports full text search and typo tolerance powered by 3rd party providers.

“ Profit is the inevitable effect of a business process that honors nature and people. If profit is to be gained at the expense of nature, then Indesso wants no part in it.”

Robby Gunawan, CEO

### Our Journey

Indesso is known as a manufacturer of multibiosour ingredients based on its main ingredients, Indesso only produces and exports Clove Leaf oil. Founded in Balikpapan, Puncakjaya, Central Java in 1968 by Robertha Hartono Gunawan, the name is an abbreviation of "Indonesian Essential Oils".

### People

In doing our business, we encounter a great number of people that contribute to our success. Thanks to our employees, farmers, and all the intermediaries, we can bring our products to the market. It is not our success alone. It belongs to the communities as well. Thus, we give our best efforts to pay back to the communities.

We cannot change what we are not aware of, and once we are aware, we cannot help but change. —Sheryl Sandberg

Initiatives Focus

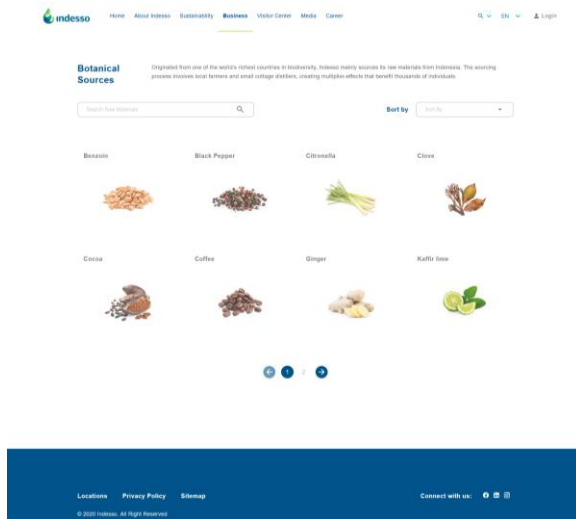

### Initiatives

Indesso Donated Hygiene Kits through Habitat for Humanity  
 Indesso Donates IDR 1 billion and Produces 9.2 Tons Hand Sanitizer to Fight COVID-19  
 Indesso's Direct Response to Cyclone Seroja Disaster

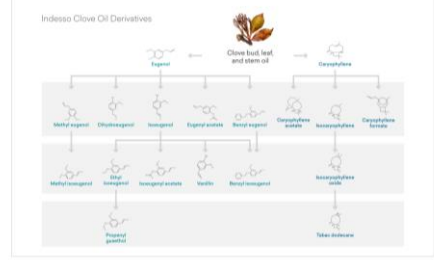

### Focus

- To enhance the sustainability life quality of the source and sites by providing support for basic needs, especially in education, healthcare system, water sanitation, and electricity.
- To empower women who reside around our sites and securing area (plantation and distillery) through workplace and community programs.
- To increase employee's well-being by creating inclusive working, working, and learning programs.

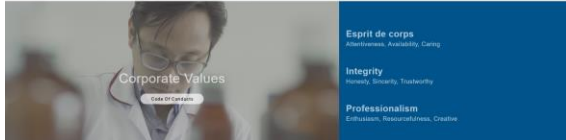

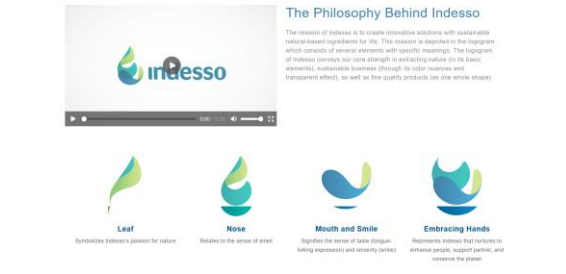

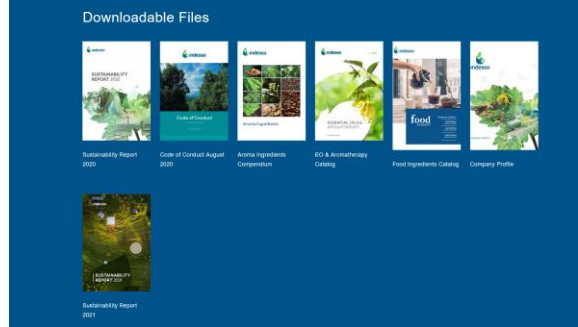

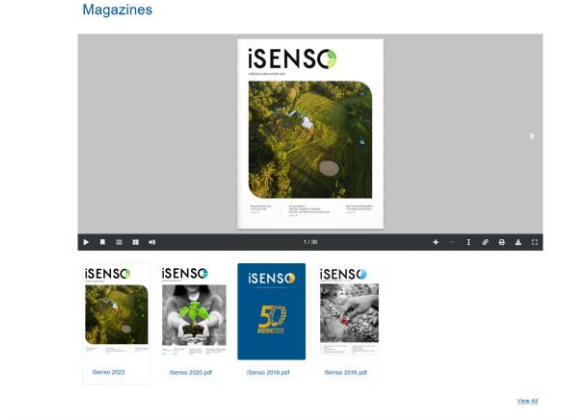

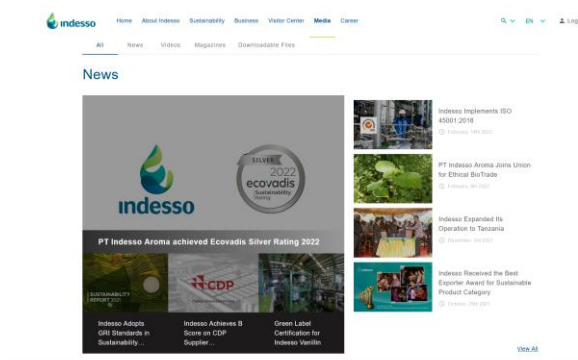

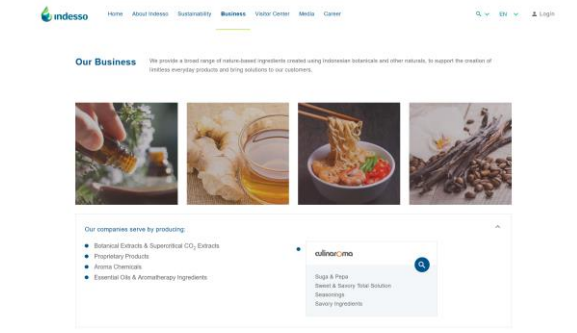

### Clove

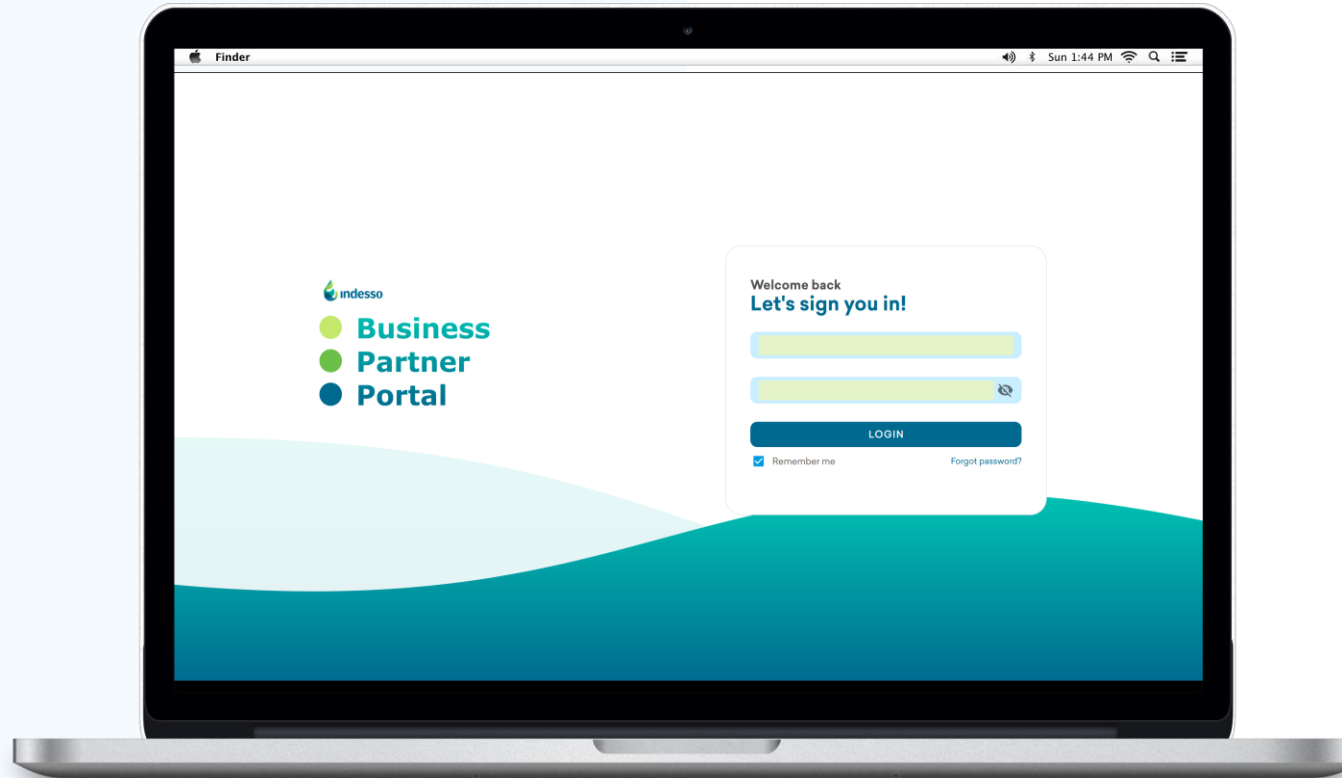

Clove is native to Indonesia and was only grown in the Moluccas until Pierre Poivre smuggled the seeds in 1710 and distributed them to other parts of the world. Now clove grows in many places including Madagascar, Zanzibar, India, and Sri Lanka. Despite that, Indonesia is still leading the global clove output. Indesso is recognized by the world leader in clove oil and its derivatives with a 40% world market share. It has typical benefits, from food flavoring to hair solutions. We have so far produced the most complete clove oil derivatives.

# Business Partner Portal Web Application

2020

Business Partner Portal Web Application

Indesso Group maintains partnership with their suppliers which must comply with national and/or international standards and regulations for each resource they are sourcing. Business Partner Portal developed as a Web Application for regulation and documentation related processes.

Indesso maintains their suppliers database and requests required documents to their business partners in the Web Application. Business Partners will receive email notification about required documents that will direct them to access Business Partner Portal to upload related documents. Another feature in Business Partner Portal are Corrective Action Requests which facilitate corrective action for any issues found in the partnership process.

**SUPPLIER SELF - ASSESSMENT QUESTIONNAIRE V0** [Draft](#) [Add Section](#)

PT Indesso Aroma expects all of its suppliers to adhere to the highest standards of ethics, social accountability, quality health, safety and environmental performance. This questionnaire is the first step of the PT Indesso Aroma evaluation process for qualification of its raw-material suppliers, subcontractors, toll-manufacturers, distributors. Our aim is to improve performance, sustainability and continuity of our business.

# E-Formula Web Application Enhancement

CoreSpec

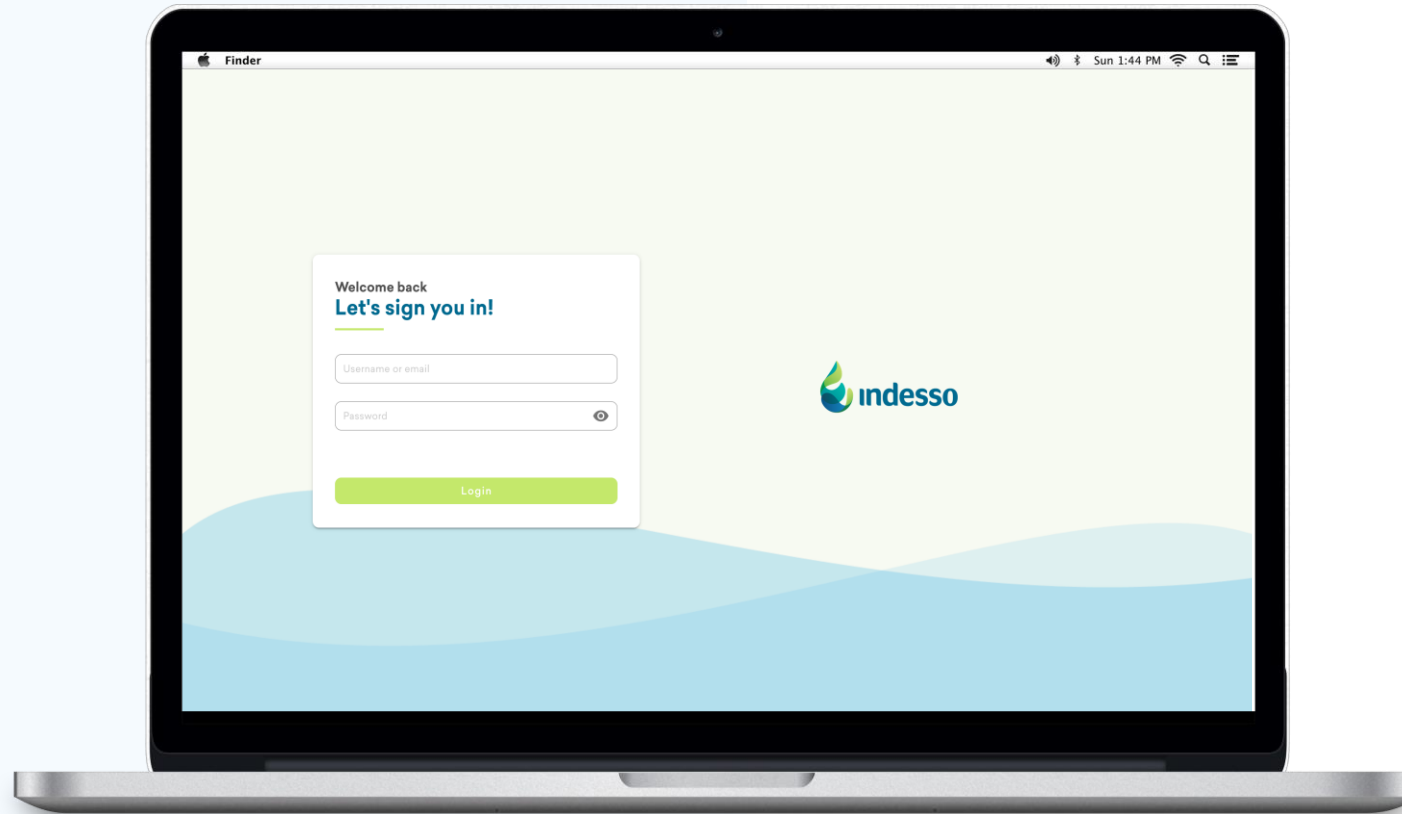

2021

E-Formula Web Application Enhancement

CoreSpec developed and enhanced two instances of Indesso E-Formula Web Application that were developed by another vendor. E-Formula itself manages formulation for Indesso products. Several features that we developed are: support dynamics fields related to formula information based on their appearance; QA Teams access to the system; Several additional documents managements including Product Specification, Safety Data Sheets, Product Data Sheets, Halal Declaration, Statement Regulatory Compliance and Statement Lab Codes.

# Document Transfer Management Web Application

2021

Document Transfer Management Web Application

CoreSpec provided consultation and developed Document Transfer Management Web Application for Indesso's Finance department to regulate and record documents transfer and financial document processing. Document Transfer feature records change of document location between employees. Financial Document processing feature facilitates invoice and other financial documents checking between financial units across company and location. This process uses QR code for scanning to quickly marked transfers between financial units.

# Lab Stock Web Application

# 2021

Lab Stock Web Application

Lab Stock Web Application helps Indesso's Laboratory Teams maintain their stocks. Product databases support dynamic categories and dynamic fields based on the category. Stocks are stored in different packaging and tracked across several warehouses/locations. Expired stocks are reminded every 90 days before, 60 days before and 30 days before expiration date. The systems also integrated with Zebra Technologies for direct from browser printing with QR code for quick search via scanning.

Incoming and outgoing stocks are recorded in outbound and inbound, any stock changes or correction must be done with stock opname features. Every stock transaction recorded for auditing purposes. We also provide integration with the custom process of Indesso Salesforce which allows sales teams' to request product samples for customers received by Lab Stock Web Application to be processed by laboratory teams.

# E-Formula 3.0 Solunova Web Application

2022

E-Formula 3.0 Solunova Web Applications

Indesso IT Department decided to revamp from scratch their E-Formula Application after consultation with external professional formulators and technical consultation with CoreSpec as the old E-Formula were deemed as unsuitable for further modifications and enhancements. This revamp is also Indesso's efforts as a standardization of the formula creation process between their laboratories.

The new E-Formula features formula creation in excel-like format to better visualize comparison between product formulas. Ease of use features such as formula duplication, undo and redo, action history, printing and auto calculation are also added. Formula Trial feature are prepared for future integration with digital scales. Every other feature of the old E-Formula is also reworked from scratch.

# Customer Portal Web Application

# 2022

## Customer Portal Web Application

We are providing consultation and development for Indesso's Customer Portal Web Application. This web application serves as an e-commerce platform for Indesso's existing customers to order products, review order status, invoices and packing lists. Each customer is handled by an account manager which sets pricing of the products for specific customers. So every customer got different prices.

Displayed prices supported in different currencies depending on customer region. Incoming orders are processed by the external SAP system automatically. Customers are also able to search and download every product related documentations such as Product Specification, Safety Data Sheets, Product Data Sheets, etc. Documentation files are synchronized from the external file repository system.

# Annual Support and Maintenance

# Annually

Annual Support and Maintenance

CoreSpec provided annual support and maintenance which covers all CoreSpec and Indesso projects since 2019. Project values are regularly updated based on the number of projects and technical difficulties annually. We also provide non-carry over 20 man-days that can be used for consultation, change requests or on request visitations.

Client

## blusherie

Blusherie is a startup company focused on building an innovative beauty solution through technology that easily connects beauty clients to their preferred beauty artists.

# Blusherie Mobile Application

# 2020

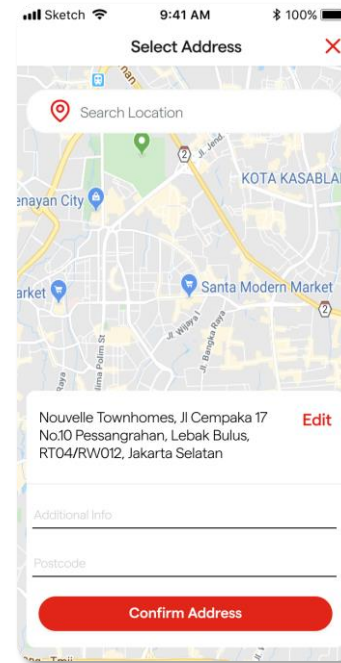

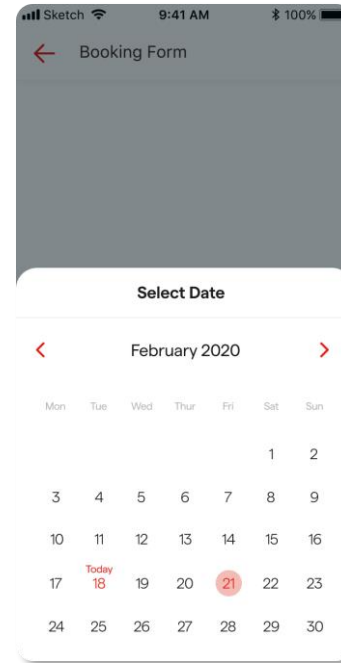

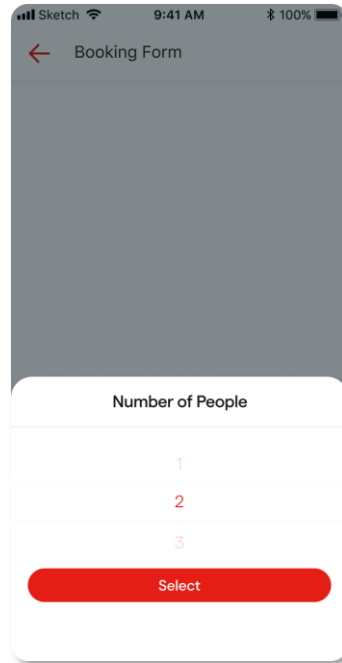

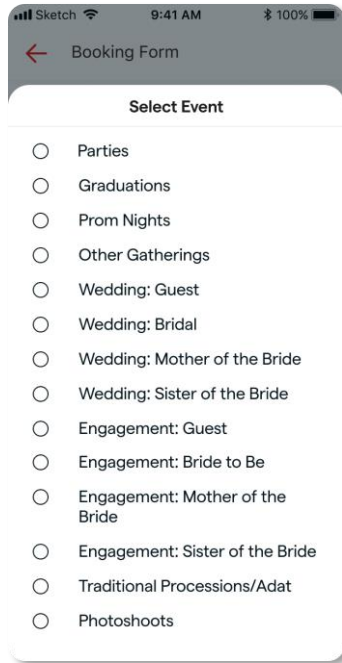

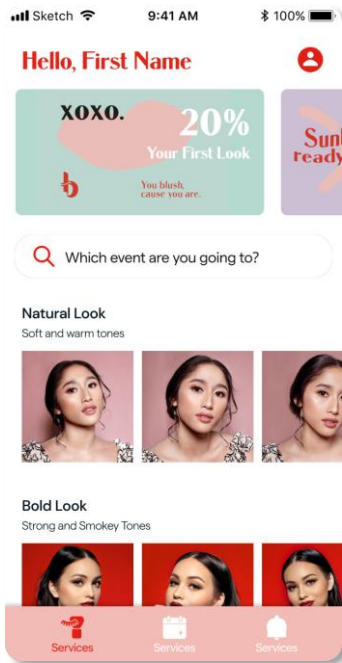

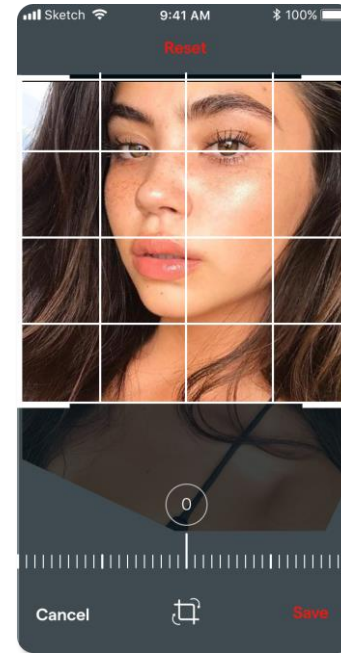

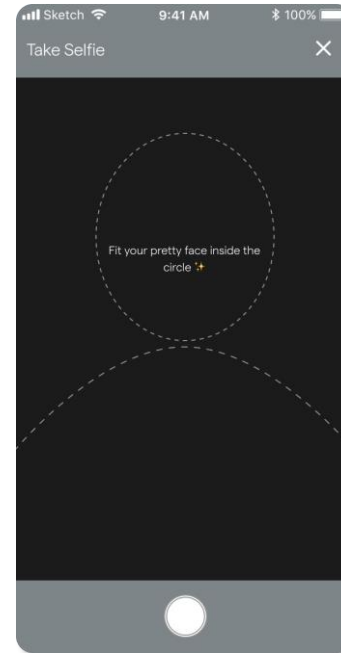

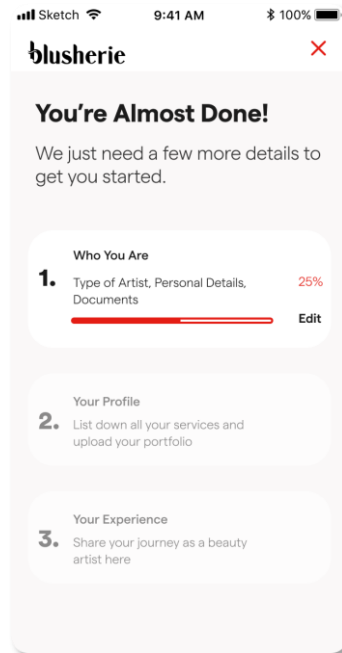

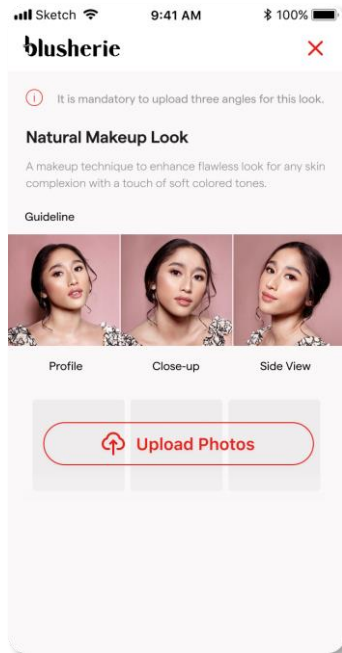

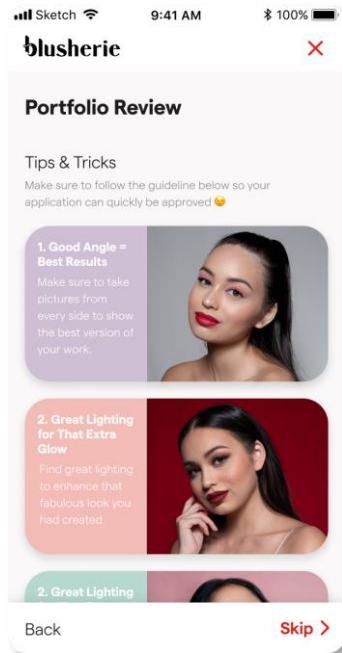

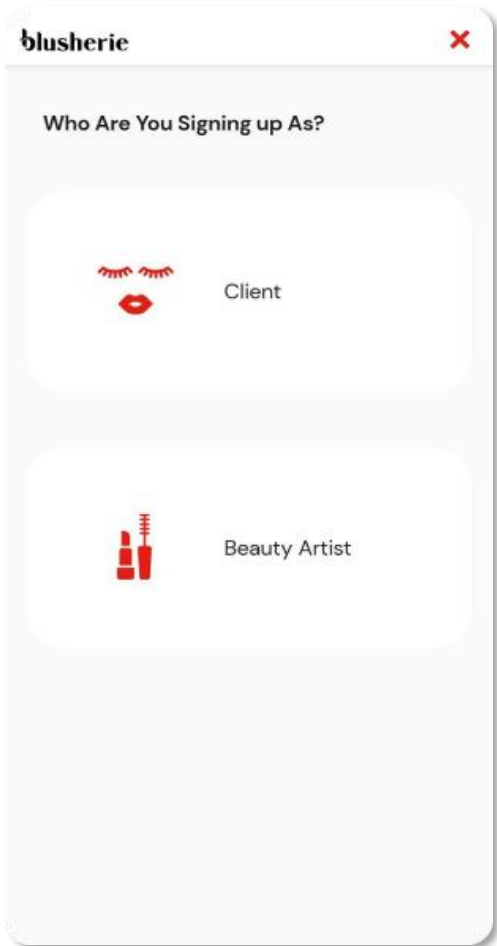

Blusherie Mobile Application

# blusherie

CoreSpec provided consultation, development and maintenance of Blusherie beauty on demand mobile application where clients have the options of available beauty artists tailored based on their preferences (budget, date of event, location, look what you prefer, and other details), while beauty artist can list their beauty service, connect with future clients and get booked anytime, organize beauty schedule automatically, and no need to think about customer support to clients.

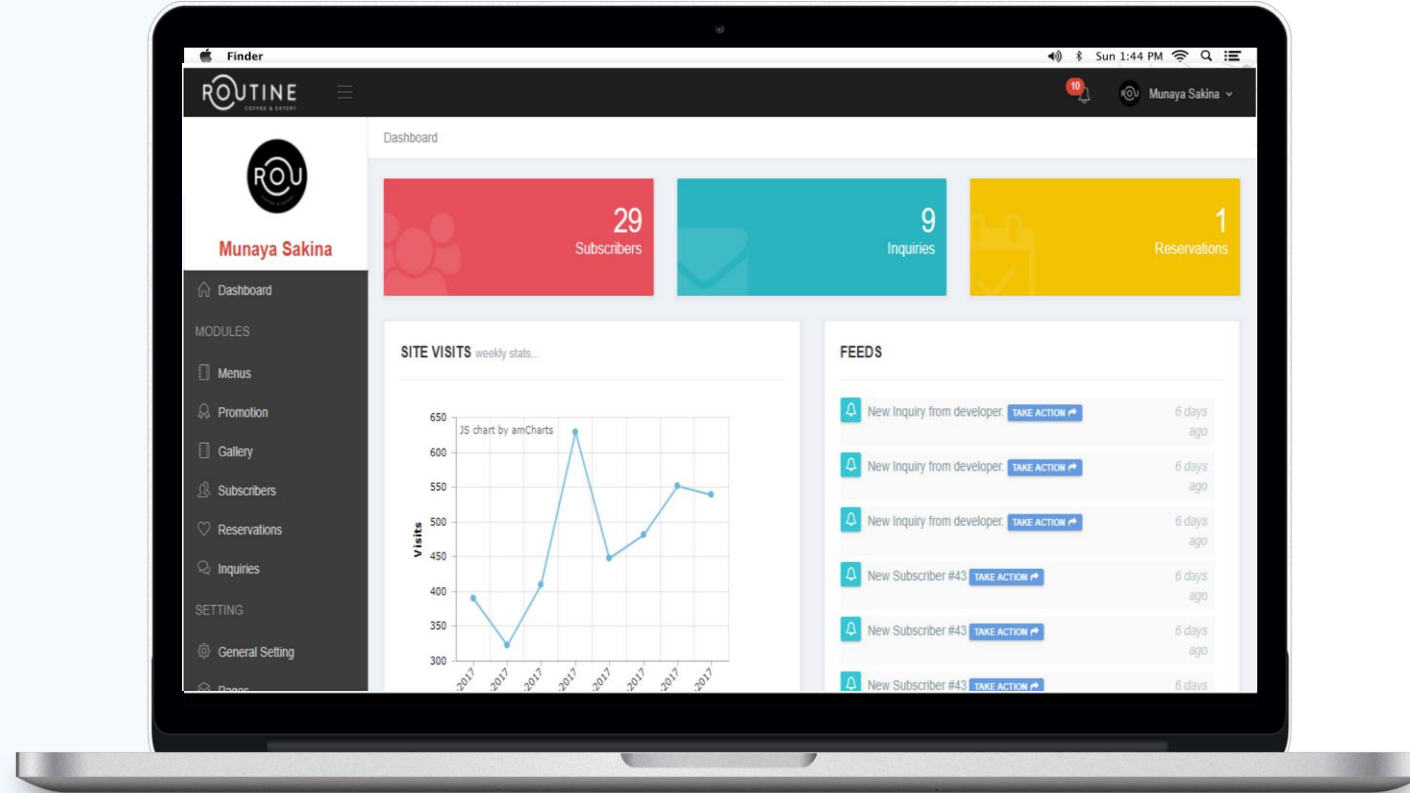

# Client

Located in Bintaro, South Jakarta, is a group of passionate people in food and beverage industry. They asked us to help them improved their customer engagement using customized solution. We listened to them and provided them a platform with reservation management, integrated inquiry/ticketing platform, and subscription & promotion system

# Routine Coffee and Eatery Website Application

# 2016

Routine Coffee and Eatery Website

The management portal designed as a Single Page Application (SPA) which separates data transaction (server) over RESTful API and the interface (client) itself to increase the user experience. With this approach, the backend system is highly scalable and ready to serve other clients medium such as Android and IOS Application.

# Client

Indonesian Welding Society – Authorized National Body (IWS-ANB) is a non-profit organization who has the main activities in conducting education, examination and qualification of welding personnel. The organization is an independent organization where the Governing Board is directly responsible to stakeholders. They regulate and authorize training organization such as PT. Darya Dipta Drestanta and issues the international acknowledged Certificate for graduated trainee.

# IWS-ANB Website Application

# 2017

IWS-ANB Website Application

We designed and built customized business solution for IWS-ANB which function as Approved Training Body (ATB) and Welding Personnel management system, Internal Work Group to share academic documents between authorized member, ATB's qualification management with automated reminder for course re- examination and expiration.

The member/administrative portal designed as a Single Page Application (SPA) which separate data transaction (server) over RESTful API and the interface (client) itself to increase the user experience. With this approach, the backend system is highly scalable and ready to serve other clients medium such as Android and IOS Application.
